- 25X1 1. The Pliva Medicine Factory, located on Ulica Lola Ribar in Zagreb, employs over 500 workers, many of them specialists. The specialists, especially those engaged in research, are well paid; overall production is reportedly of a high quality. This factory contains a research and testing section for the production of medicines hitherto never produced in Yugoslavia; it is hoped that the country can be made independent of foreign sources of medicines.
2. As a result of a serious shortage of bottle glass, medicines sometimes must be stored in the factory warehouse and cannot be distributed to drug stores and clinics. Aside from this, the supply of raw materials to the factory is adequate.
